Good morning Jonathan,

Following the September 25th deadline, the committee met yesterday to consider applications to the off-campus experiential learning fund.
Thank you for your thorough outline and thought when it came to putting together the application for yourself and the other members of your cohort.

The committee is excited about your application, and we are able to offer funding for your flights totalling no more than **$16 000**. This is more than you originally requested, but we were hoping that this additional amount would account for any potential variation in flight costs since your application and would allow all 8 members of the collective to attend (should they all still be interested).

In order to make this process as easy as possible, and to avoid any students having to pay for flights on a personal credit card, we are hoping to work with the travel agent that NSCAD uses for faculty and staff travel to book these flights for you. I will be reaching out to them to provide a 'heads up' that more details will be on the way.

You are more than welcome to reach out to the rest of the parties on your application, and please let them know that I will be reaching out to all of you individually to detail the following conditions of the funding for this project.

- Any students leaving the country will need to confirm they have valid passports and necessary visas to enter their destination.
- Students travelling will be required to have medical/travel insurance
- Students travelling will be required to sign a travel waiver and will be briefed by OSE
- Students will need to give a presentation and written report about the experience upon their return
- Students must agree to having their names and project details released to the donor

Please let me know if any of the above parameters are limiting for you personally and let me know if you have any updates as to specific desired travel dates before we move forward to next steps. I will

need all students to confirm their eligibility per the above requirements before we can book flights.

Best,

ESME NEWLING-SELBY (she/her/hers), MSc

Amazing!! Wonderful news.
I am meeting with the other students in the collective tonight and I will get in touch again tomorrow. A question one of my peers had was, if they were not able to go at that time (because they have their grad show in early Feb) could we plan another session of this project that would occur in the spring, with this funding? Just wondering if there's any wiggle room.
Thanks so much! So excited.

Just wanted to update you, instead of what I mentioned above, the members of our group who have shows coming up first we're going to travel over reading-week in November instead!
